

Best Management Practice for Disinfecting Golf Carts

- 1) Rinse all parts of the golf cart.
- 2) Spray Neutrafect™ on the outside and inside of the cab as well as the rear bag and storage bin. See illustration below of cart **areas** to focus.

- 3) For best results use a Neutrafect™ sprayer with a Branch Creek® Pump Free Sprayer Head.
- 4) Spray enough Neutrafect™ that it will take at least 10 minutes to dry.
- 5) After 10 minutes wipe off any excess moisture or allow to continue to air dry.
